

WISTA

WISTA Management GmbH (WISTA) and its subsidiaries take on a broad and diverse range of tasks and services across four locations across Berlin (Adlershof, Charlottenburg, Dahlem, Berlin South East).

WISTA is a committed technology park developer and operator, successful business promoter, and experienced networker.

WISTA.Plan

WISTA.Plan GmbH is an urban developer and trustee of the State of Berlin. It has extensive expertise regarding planning, developing, and marketing state-owned properties.

WISTA.Service

The portfolio of WISTA.Service GmbH contains the whole spectrum of facility management services. In addition to managing buildings of WISTA Management GmbH, the company manages those of many private owners in Adlershof and other locations all over Berlin. It is eligible for in-house procurement by public clients.

You will experience conventions, conferences, or parties in extraordinary venues surrounded by impressive architecture. Our team of professionals will make sure your event will be nothing short of excellent.

WISTA conventions plans and organises events at venues that breathe innovation.

Shape, connect, implement

Establishing, renting, acquiring

Our high-technology locations are the product of a dense network of innovative companies as well as university-based and non-university research institutions, where we support new businesses, let out state-of-the-art offices, labs, and manufacturing spaces in attractive start-up centres, and provide companies and project developers with space to grow.

Our commercial endeavours are an integral part of future-oriented urban planning concepts, which consistently integrate urban infrastructure, urban neighbourhoods, and sustainable landscape planning.

Charlottenburg

Located in Berlin's City West, the Charlottenburg campus is one of the most important places for generating future innovation ('Zukunftsorte') in Germany's capital city. It is a research and development location with a focus on ICT, the creative industries, art, traffic, and mobility. Charlottenburg is home to several important research institutions in close vicinity to the Technical University Berlin (TU) and the University of the Arts (UdK):

Fraunhofer-FOKUS, Fraunhofer IPK, Heinrich-Hertz-Institute, DFG Research Centre MATHEON and the National Metrology Institute (PTB).

The local university-based and non-university research institutions foster spin-offs from technology-focused companies.

The WISTA-operated Charlottenburg Innovation Centre (CHIC) makes sure that these start-ups get the support they need. Then there is INKULAB, which has state-of-the-art chemical laboratories at its disposal.

Berlin South East

WISTA has been committed to Berlin Schöneeweide's economic development with a regional management office since 2011. It has since expanded its tasks, developed an updated brand identity (Regional Management Berlin South East), and will expand its activities to include the whole Treptow-Köpenick district

until the end of 2020. The team's activities focus on a range of key tasks that include developing an IT-based network for new companies, a concept to secure and develop premises for commercial purposes all over the district, and a regional marketing concept with long-term networks for cooperation.

your fast track
to innovation**

Dahlem

The WISTA technology and start-up centre in Berlin-Dahlem, FUBIC – Business and Innovation Center next to Freie Universität Berlin, will go into operation in 2020. It will create more space for technology-focused start-ups and established young companies with a focus on life sciences, the health industry, and information and communications technologies. In addition to fostering and supporting new start-ups and cooperation between science and business,

the 50,000 sqm-area of FUBIC provides ample space for established companies to grow. FUBIC is likely to create up to 1,000 jobs. Thanks to the high density of institutes and technology-focused companies that exist in Berlin-Dahlem today, the area can rightly be called a 'place of future innovation.'

Adlershof

Covering an area of 4.2 sq km in Berlin's South East, Adlershof is one of Europe's largest locations for high technology. WISTA is an experienced technology park developer and operator as well as a committed service provider and business promoter. As an initiator and economic catalyst, WISTA contributes to strengthening the foundation of Berlin's regional economy by bringing together scientists and entrepreneurs. Its tasks include constructing, operating,

and marketing modern technology centres, as well as selling properties. WISTA also fosters new businesses, supports companies, promotes cooperation between science and business, and advances national and international cooperation. To give young companies a successful start, WISTA operates the Innovation and Start-up Centre (IGZ), a Coworking Space, and the Adlershof Founder's Lab, a successful funding instrument for start-ups. Our A² Adlershof Accelerator gives start-ups the opportunity to advance their business idea by cooperating with established entrepreneurs.
