

Science and Technology Park Berlin Adlershof

www.adlershof.de

The Berlin Adlershof Science and Technology Park in the southeast of Berlin is the largest of its kind in Germany and a leading location for technology-oriented companies. Covering 4.6 km², it combines cutting-edge research, business, and teaching into a high-performance innovation ecosystem.

Companies and research institutions develop solutions here for key future challenges. The close connection between science and industry accelerates the path from research to market readiness and promotes sustainable growth.

1) Strength Through Networking

Eleven non-university research institutes, seven institutions of the Humboldt University of Berlin, and around 1,350 companies form a tightly networked ecosystem with access to expertise, talent, and services.

2) Spaces for Growth

Flexible real estate solutions—from high-end laboratories to office and workspace concepts—adapt to every stage of a company's development.

3) Perfectly Connected—For Work and Life Balance

Adlershof is quickly accessible from the city center and Berlin Brandenburg Airport (BER) via public transport and the A113 motorway. On-site amenities ensure short distances and a high quality of life for employees and around 6,000 residents.

Technology fields
and centres:

**Biotechnology &
the Environment**

Photonics & Optics

**Photovoltaics &
Renewable Energy**

**Microsystems
& Materials**
